Setup

1. Ensure you have Python **3.8** (and `pip`) installed. Other versions are not guaranteed to work.
2. Install python required packages, run from root folder: `pip install -r requirements.txt`

How to run

As a python script

- run `python run_models.py`

As an executable

- set executable bit on `run_models.py`
- run `./run_models.py`
